

RFQ Information Checklist

Prepare the minimum information CNC GROUP engineers need before recommending a model, power range and export configuration.

Contact and destination

Item	What to prepare
Contact person	Name and business email for quotation communication.
Country / region	Destination country, nearest port if known, and preferred language for follow-up.
Voltage and site	Available power supply, workshop environment, and installation constraints.

Workpiece information

Item	What to prepare
Material	Carbon steel, stainless steel, aluminum, galvanized sheet, tube profile, or other material.
Thickness / size	Normal and maximum thickness, sheet size, tube length, tube diameter or part drawing size.
Production target	Daily output, batch size, accuracy expectation, and whether automation is required.

Quotation focus

Item	What to prepare
Product interest	Fiber laser cutting, tube cutting, welding, cleaning, robotic automation, or CNC plasma.
Options to discuss	Laser power, safety cover, loading system, chuck, cooling, software, robot payload/reach, spare parts.
Documents	Manuals, packing list, invoice, certificates or other documents required by your market.

Note: final machine configuration should be confirmed by material, thickness, drawings, site layout and destination market before order.
